

District Hardship Committee,

I am writing in behalf of Jaclyn daniel. She is a young lady who has been granted a reciprocal transfer agreement between our district and grants pass school district due to some social and emotional issues she was experiencing at GPHS. She was being harassed and called a variety of names that led to a deep depression. Her mother and her decided to get a fresh start and transfer schools fro Jaclyn's emotional well-being. They went through the process and was granted a transfer on August 6th, 2015. They were under the impression that all was good for her to begin her new life at NVHS. She shortly after receiving word she was going to attend NVHS found out that the volleyball program was having a camp at the school. On August 12th she attended the camp for the last day. Due to this failure to complete the Intent to transfer paperwork (she thought she had already transferred) she is ineligible for the school year without a district committee approval. As you can see, the transfer was necessary, and I hope the district committee can see that participating in athletics will only benefit the student in acclimating to her new school and creating the social and emotional bonds she was lacking at GPHS.

Sincerely,

Erik Lathen
Vice-Principal / Athletic Director
North Valley High School.
