

To Whom it may Concern:

My son Garrett Padgett had an extremely hard year last year. He was struggling with mental/emotional problems and got himself in quite a bit of trouble, resulting in him having to be removed from our home for four months.

When this happened, school was put on the back burner so we could focus on getting him the help he needed. He was seeing counselors and a psychiatrist and they recommended that he enter a day treatment school. While at Kairos the main purpose was to help he learn to deal with "life".

Things are not perfect, but he is doing much better and he wants very badly to get caught up so he can graduate on time. He is well aware that this will take hard work.

I was very excited that he took an interest in football. He is definitely a kid who needs to keep busy and having such a physical activity has been great for him.

Thank you
Heather Westfall

I did not receive all my credits last year because I transferred from Winter Lakes to the Kairos day treatment program. I had a very rough ~~year~~ year this year. I got in some trouble and ~~went~~ went to the Bob Belloni shelter and during my stay I enrolled in the Kairos program for some extra help. While they tried to help they ~~didn't~~ ~~se~~ with my schooling ~~they~~ they were mostly focused on helping me mentally. This year I would like to do better in school, I ~~plan~~ plan on getting caught up in school. I would ~~so~~ really like to play ~~football~~ football this year.

Thankyou. Garrett Pudgett
