**To Whom It May Concern:**

Katelyn McCall is currently under my medical care for a concussion. Her concussion symptoms have completely resolved and she is cleared to participate in soccer without restrictions this fall. Her concussion occurred in January of 2015 and she was symptomatic for several months affecting her ability to study and concentrate. Therefore, she performed quite poorly academically despite academic accommodations. Katelyn was unable to complete her class work and maintain athletic eligibility as a result of her concussion. It is medically indicated for Katelyn to be granted exception in this case.

If you require additional information please contact our office.

Sincerely,

Provider: Michael C. Koester MD 08/18/2015 04:39 PM
