Re: Valerio Tarlazzi  
Italian Exchange Student  
Wilsonville, High School

Subj: Valerio Tarlazzi's attendance at Wilsonville High for the 2015/2016 school year

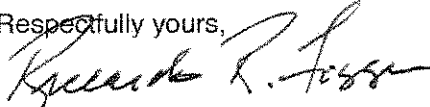

Valerio came to our home in the Wilsonville school district for the primary purpose of immersion into our society to learn english. He was preceded by his brother four (4) years ago and his cousin seven (7) years ago. His cousin is now completing medical school in Italy and will soon go to Germany for his residency in anesthesiology. His brother is about to complete his studies in economics in the Milan School of Economics.

While he is here, Valerio would like to play soccer and basketball for Wilsonville High. This desire plays a secondary role to his studies and his desire to learn english. He has no desire to stay in the country after this year. He will be returning to Italy to complete his fifth (5) year of high school studies as did his cousin and his brother.

My wife and I are very proud that these young men want to come to America to live for a year in our community and we are especially proud of their very progressive Italian parents who have made it possible to send them to us for a year of mentoring their stay in this country.

To be succinct, my wife and I would be happy to certify that there are **no** other motives that we are aware of for their being here

Respectfully yours,

  
Riccardo R. Foggia, M.D. (Ret.)
