

To whom it may concern,

I am writing to you on behalf of my daughter Christina Boston. We would like to receive a hardship granted so that she may participate in fall soccer.

Her junior year of high school was difficult due to her mental anguish. This led her to be removed from school by her principal. At this time her mental health therapist, physician, and psychiatrist, had agreed to send her there. At this point she was sent to NWBHS which led her to missing much of school and falling behind 1/10 of a credit short.

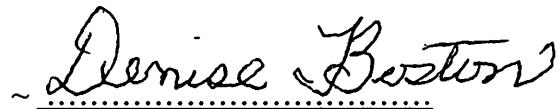

She is starting Reynolds High School for a fresh start and would like to continue with playing soccer, but we have been informed that we need to pursue a hardship. By granting her this, it will give her the outlet she needs to stay focused and give her support in a team environment.

Now that she has received the support she needed for mental health for mental health. She has been given the tools to start school again and make a fresh start.

Giving her this this hardship will allow her to use soccer as a healthy outlet for her stress.

Thank- you,

Denise E. Boston
