Re: Dylan Miller

This letter is to confirm that Dylan Miller has participated and engaged actively in weekly individual and family therapy while in the Phoenix Residential program from 4/6/15 until current. At the outset of therapy, he was able to identify clear goals of learning skills to increase thinking before acting, increase empathy and consideration of others, and improve his communication with and response to the supervision of his parents.

Through the course of treatment I have experienced Dylan to be engaged and invested in learning skills and approaches to improving his impulsive behavior. Dylan has participated actively in self-disclosing past and present problem scenarios, exploring pros and cons of his behaviors, brainstorming alternative solutions to problems, and role playing (practicing) new behaviors. Dylan has also shared multiple successes in improving his thinking before acting while in Phoenix program as well as during visits home with his family.

To support his success in the community, Dylan has expressed an interest in playing football as a means to positive physical expression, positive peer development, and as a motivator to keep his grades up. I support what allowances can be made to maintain Dylan's goals.

I hope this information is helpful. Please feel free to contact me if you have further questions.

Sincerely,

Eric Lackie, LMFT
