Dear OSAA,

I am aware that my son, Gustavo Salas is shy a few credits of being eligible to play soccer, but rest assure that he is trying to improve his academic standing and he has a great desire to participate in the sport. I would also like to add that he has improved academically since he first moved to Albany Options School. According to one of his teachers, he has shown more academic effort and drive since he has arrived. I believe that if he is granted the privilege of playing soccer then it would only continue to steer him in the right path and motivate him throughout high school. With this being said, I would encourage that you take the necessary steps to clear him of any holds. I hope this letter is sufficient in order for him to be allowed to play and participate with his peers in something as healthy of an outlet as soccer is.

Sincerely,

Leticia Salas
