

Dear OSAA,

I'm writing this letter to explain my situation with my eligibility to be able to play soccer for South Albany High School . Freshman year after soccer season I didn't pass all my classes and didn't get all my credits that I needed to be eligible to play again sophomore year. I would follow my friends and older brother foot steps skipping class not doing the right thing and than I realized I have to make my own choices for my future but it was a little too late to try and fix my grades , I eventually got expelled with not the right amount of credits to play. So than I got sent to Albany Options still had a bit of trouble with my grades and attendance ,but than I wanted a change, A good change for me was to do good in school and focus . I ended up passing my classes not with all high grades but I gave it my best shot and earned credits to begin making up for the lack of credits earned. I showed lots of improvement , showed up to class, worked hard to be able to be back on the field with South Albany soccer team . My choices that I've made for myself at this point are good: staying focus in school, doing the right thing so I can play again soccer

Sincerely ,
