To Whom it May Concern,

As the International Coordinator for Global Horizons and Hosanna Christian Academy it is my job to place our international students in good loving homes. But, because we are a small 1A school finding enough homes to host our international students is a problem. Because a large majority of our families also help coach, it's almost impossible to find homes for these students outside coaches and their families. I will say, our coaches have had absolutely no say in which students I will accept or not accept.

Oskar Weber was placed with the John Mick family because I needed a good home for him and no other reason. They also have a son that is the same age. The OSAA activities that he plans to participate in will be the 1st time he has ever experienced this activity in his lifetime. He would like to play OSAA athletics. Please do not exclude him because we don't have many options for host homes for these students.

Thank you for all considerations,
