To Hardship Committee:

It has come to my attention that due to my Marcy and my residency that this letter must be written so that our son Levi can play sports. We are currently in the process of selling our home in Gig Harbor, WA .It is listed with Keller Williams. We are currently living in Sisters, OR. I work as a Firefighter/ Paramedic in Silverdale WA. and I am soon to be retiring from this profession. Since I do not work everyday I am commuting on my days off to be with my family here in Or. The process of selling and moving is a difficult one and Levi deciding to play football was a surprise to us as he has not competed in this sport before. Though he did try out last year he did not start the season because he wasn't sure he liked it. Sports are a great supplement to stress reduction during a period like this in his life as well as the other benefits of fitness, team work and comradery. Sisters has been a second home for our family for many years and my wife and I have been coming to central Or since we were teenagers. We want to become apart of this great community. I hope that this provides enough information for you to allow our son to play. Thank you for your consideration. If you have any further questions please give me a call.

Sincerely, Michael Kroll
