

Why football is for me

My name is Ajay Hulse. I become a huge fan of sports since I was a little kid. There are many reasons why I should play football. The main topic is to push me. Not only for to become stronger, mostly to boost me on being strong minded towards school work. Sports such as football will make me focus on my studies and help improve my academics. Due to falling behind on school I just didn't have a reason to thrive to have good grades because I was not involved in extracurricular activities. If I do get a chance to play for the Wallowa Cougars, my GPA will be constantly checked. Not only should sports increase my grades, but will help me create a positive mental attitude. I'm really excited to go and meet new people and make friends on and off the field. By giving me a waiver would not only be helping me but helping my coaches have another well needed player on their team. Also playing football or sports period would help me have a reason to want to succeed in school so therefore I can continue playing and it will keep things outside of football and school off my mind.
