Edgar A Chavez

Edgar has made yearly progress toward graduation goals. Edgar has been diagnosed with a Specific Learning Disability and is working toward a Modified Diploma. Edgar has completed the majority of the required core classes for the Oregon Modified Diploma.

Edgar suffered from seizures as a child, but as a teenager those have subsided. The present level of development and functional performance Edgar struggles with long term retrieval and short term memory: therefore he struggles in language intensive classes like English Language Arts.

Edgar is enrolled in classes that will lead to the progress of graduation this year but that said he does have until he is 21 to graduate. Edgar has made his transition goals and he would like to be a mechanic after High School.

Edgar is a good student and participating in sports will help him with having a well-rounded educational experience and developing memory skills.

Thanks

Timur Gaston
