**Subject:** Hello,

Hello,

I am writing this in regards to my son who is a student/athlete (Quentin J. Scott) at Madras High School in Madras Oregon. We moved across the country upon my wife and I finishing college to work for the tribes. We left mid April of 2015. Quentin stayed in Prineville with a host family, The rest of the family living in different households. We basically were homeless and struggling to make ends meet. I believe this is more my fault than his.

I feel this wasn't my sons fault from bad grades to recent suspension/expulsion issues. I feel the environmental changes and the distance in between our families place of residence caused the disconnect. I forgot to mention his freshman year started bad as I was absent and living across the country on an Internship. I feel had I not had to leave he wouldn't be a year behind, but I wouldn't have graduated. This misfortunate events and moves have caused Quentin to make decisions were preventable. Please review and make a valid investigation of my sons possible eligibility , thank you.

Sincerely ,

Jaime L. Scott
