To Whom It May Concern:

Lexus Webb suffered a traumatic brain injury on 8/30/2015. She continues to struggle with symptoms and has been referred to our rehab team. She is not cleared for Dance or P.E. She can go to socialize at dance practice for a few minutes but cannot be at practice for an extended period of time or participate in any amount of dance practice. She needs to focus on her rehab and needs to be in a quiet environment to recover. We will reassess her symptoms in 4 weeks.

To whom it may concern,

Lexus sustained is participating in the Concussion Management program at OHSU. She would benefit from the following accommodations to ensure she is meeting her learning objectives. She would benefit from a 504 plan at this time.

**School Suggestions:**

Additional educational support is available through the Center on Brain Injury Research and Training (CBIRT). Web [www.cbirt.org](http://www.cbirt.org); Email: [nowatzke@uoregon.edu](mailto:nowatzke@uoregon.edu) Phone: 541-346-0597 to connect to the TBI liaison in your area

1. All tests to be completed in quiet location separate from the class with additional time to complete them, open book when possible and/or take home
2. Reduced days as tolerated.
3. 25%-50% decreased in HW to allow for adequate cognitive rest.
4. Additional time to complete homework (3-5 days) assignments to accommodate for slowed speed of processing.
5. Shortened assignments and fewer choices.
6. Frequent breaks as needed. Please allow Lexus rest in the nurses office or other quiet location, allow her to have "in class" breaks, to be arranged with teachers
7. Teacher checking in with Lexus and her family periodically to discuss concerns or questions.

Thank you for your consideration in this important matter. Please do not hesitate to contact me with any questions or concerns.

Sincerely,

*Michal Rubin MS, CCC-SLP*

To Whom It May Concern:

Lexus was seen in our clinic on 12/24/15 for a concussion. She is cleared to return to dance without acrobatics or contact. She can practice dance on the side on her own but cannot return to dance that would put her at risk for contact with other dancers. We will see her in 2-4 weeks to clear her to full dance.
