Plan of Care

11/02/15 0900

To Whom It May Concern,

Emma Beth Williams is my patient, and she was hospitalized in the Intensive Care Unit at Randall Children's Hospital from 10/19/15 to 10/21/15, with a life-threatening illness, toxic shock syndrome. In my professional medical opinion, Emma Beth Williams will greatly benefit from being part of the Bridges Academy program, as her body continues to completely recover from her illness, to catch up on her school absence and schoolwork.

Sincerely,

Aishwarya Deenadayalu, MD
