RE: Dante' Hatcher Vasquez

Dante' is a sophomore at Mountain View High School. He would like to play on the golf team this spring. Dante' was hit in the head with a medicine ball during his Weight Training class at school In October, 2015. He is being treated for a concussion by Dr. Ugalde at The Center in Bend.

Dante' missed a fair amount of school during the months of November and December due to his attending physician's orders and concussive symptoms. He was unable to catch up on missed work before the end of the semester. He was able to pass four classes, but received incompletes in A/P History, A/P Literature and Geometry.

Dante's counselor is working closely with him and has revised his schedule, which will allow him to succeed in all of his classes and address the incompletes prior to the end of the current semester.

Please take these extenuating circumstances under advisement as you review Dante's transcript and his request to join the golf team. Dante' has traditionally been a good student and is very motivated to work through this set back. Thank you for your consideration.
