Re: Britainy Copeland
DOB: 12/09/98

Britainy missed alot of school her Freshman year of high school, due to illness. I saw her alot during that time. Things now seem to be leveled out, and the issues no longer exist in her current school environment. Britainy is an active young lady, and needs exercise. She desires to play softball, and I believe that would be good for her. She does have asthma, but has an inhaler to use if needed. This should not be a problem. Please allow her to participate in sports.
