Letter of Hardship

Last semester I decided to challenge myself and take an Advanced Placement Statistics math class. I immediately realized that there was a much larger homework load and the material was more complicated but I decided to stay in the class. Unfortunately I fell behind early in the semester and even after trying to understand the material with the help of friends and my teacher I was unable to recover my grade. With the exception of this class, I am a straight A and B student. I have learned a great deal from this experience and know now what I can and can't handle. Thank you for your consideration.
